

WHAT'S INCLUDED:

Heatlie BBQ with Gas Hose - This connects to the Gas Regulator
Remove plastic from hotplate before turning unit on

Gas Regulator Stand & Gas Bottle

Step 1. Connecting Gas, Gas Regulator & BBQ

Before Lighting

1. Be sure the BBQ side is at least 200mm away from any combustible surface and 1.5 metres overhead. 2. The unit should be placed on a firm solid surface. 3. The unit should be leveled, with a slight incline to the front to be sure that the fat runs into the front valley. 4. Place the waste container under the spout, in the holder, on the front of the unit. 5. Turn gas burner controls to the OFF position. 6. Turn on valve at the 9kg gas cylinder (for LPG model). 7. Check there are no leaks.

Lighting

Lighting 1. Turn on front gas burner by pushing down the knob (see Figure F10) and rotating to high. Then push piezo ignition button until burner ignites. Or, light the front burner using 40mm match through porthole, located on the right hand side of the BBQ front panel. If ignition does not occur within 15 seconds, turn off and wait 30 seconds before trying again. 2. To light rear burner turn knob to high and push piezo igniter or allow about 10 seconds for "cross lighting" to occur. 3. Do not leave on High for more than 3 minutes without food load as it may distort or damage hotplate

FIGURE F10

Gas supply problem

Turn the knob slowly prior to ignitor clicking so gas has time to enter the burner

Check cylinder valve is open
Check the Connection into the gas bottle is tight enough to engage supply

Check gas bottle is not empty
Check hose is connected at the Regulator connection are engaged (see instructions) correctly

GAS REGULATOR STAND

CONNECT gas line from BBQ to the regulator noting the grooves that the bayonet lines up with. Once inserted twist to lock the connection

CONNECT gas line from gas regulator to gas bottle (screw in) counter clockwise

- Note black top gas bottles require enough tightness to release 2stage connection.
